Rampravesh: Full-Stack Software Engineer

BTech Engineer & Freelancer specializing in cutting-edge development, security, and digital solutions

Top 20 Programming Languages Mastered

Web Development

JavaScript, Python, PHP, Ruby, TypeScript

Systems & Mobile

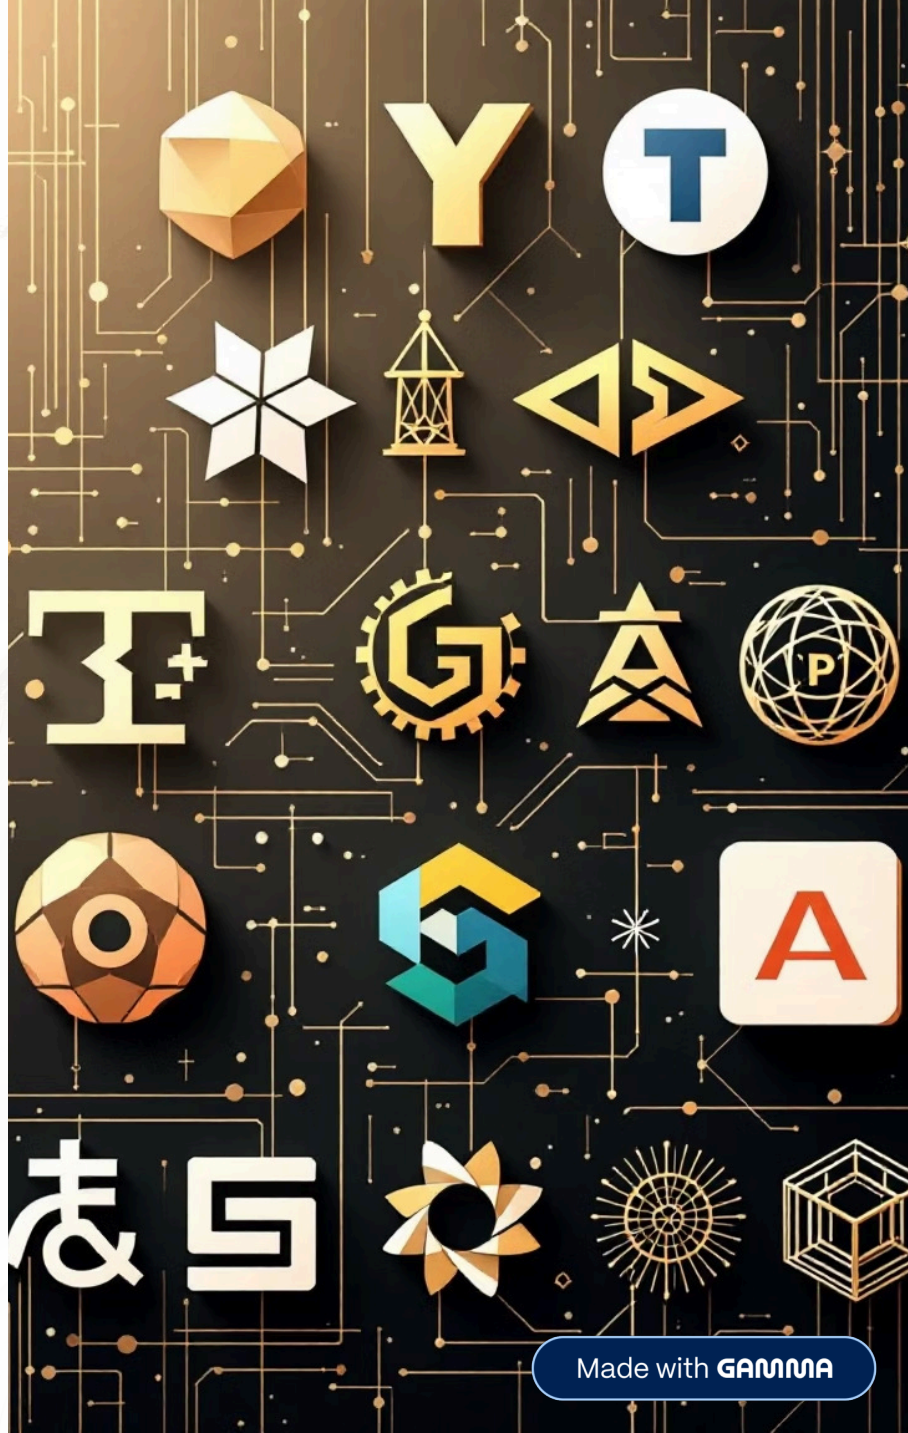

C#, Java, Swift, Kotlin, C++

Specialized

Go, Rust, Scala, R, SQL

Emerging Tech

Solidity, Dart, Julia, MATLAB, Shell

Full-Stack Web & App Development

Frontend Technologies

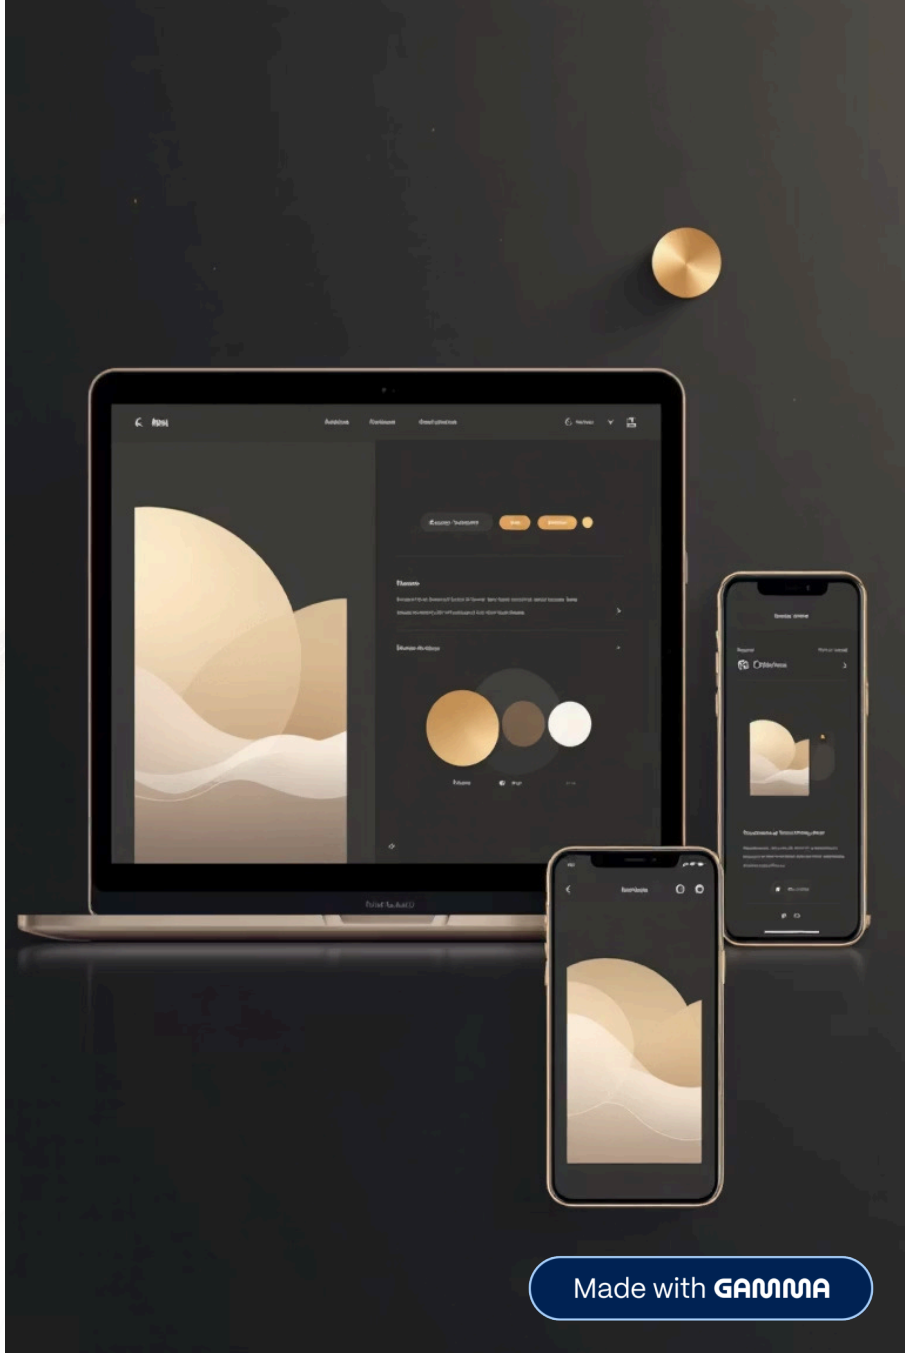

- React, Vue.js, Angular
- HTML5, CSS3, Bootstrap
- Responsive design frameworks

Backend Solutions

- Node.js, Django, Flask
- Express.js, FastAPI
- RESTful API development

Mobile Development

- React Native, Flutter
- iOS & Android native
- Cross-platform solutions

Made with GAMMA

Game Development & 3D Animation

Unity3D + C#

Professional game development with Unity engine and C# scripting

Blender + Python

3D animation and modeling with Python automation

AI Integration

AI-enhanced game mechanics and procedural generation

Made with GAMMA

API & Payment Integration Expertise

AI API Integration

OpenAI, Claude, image generation APIs, and URL processing services

Global Payments

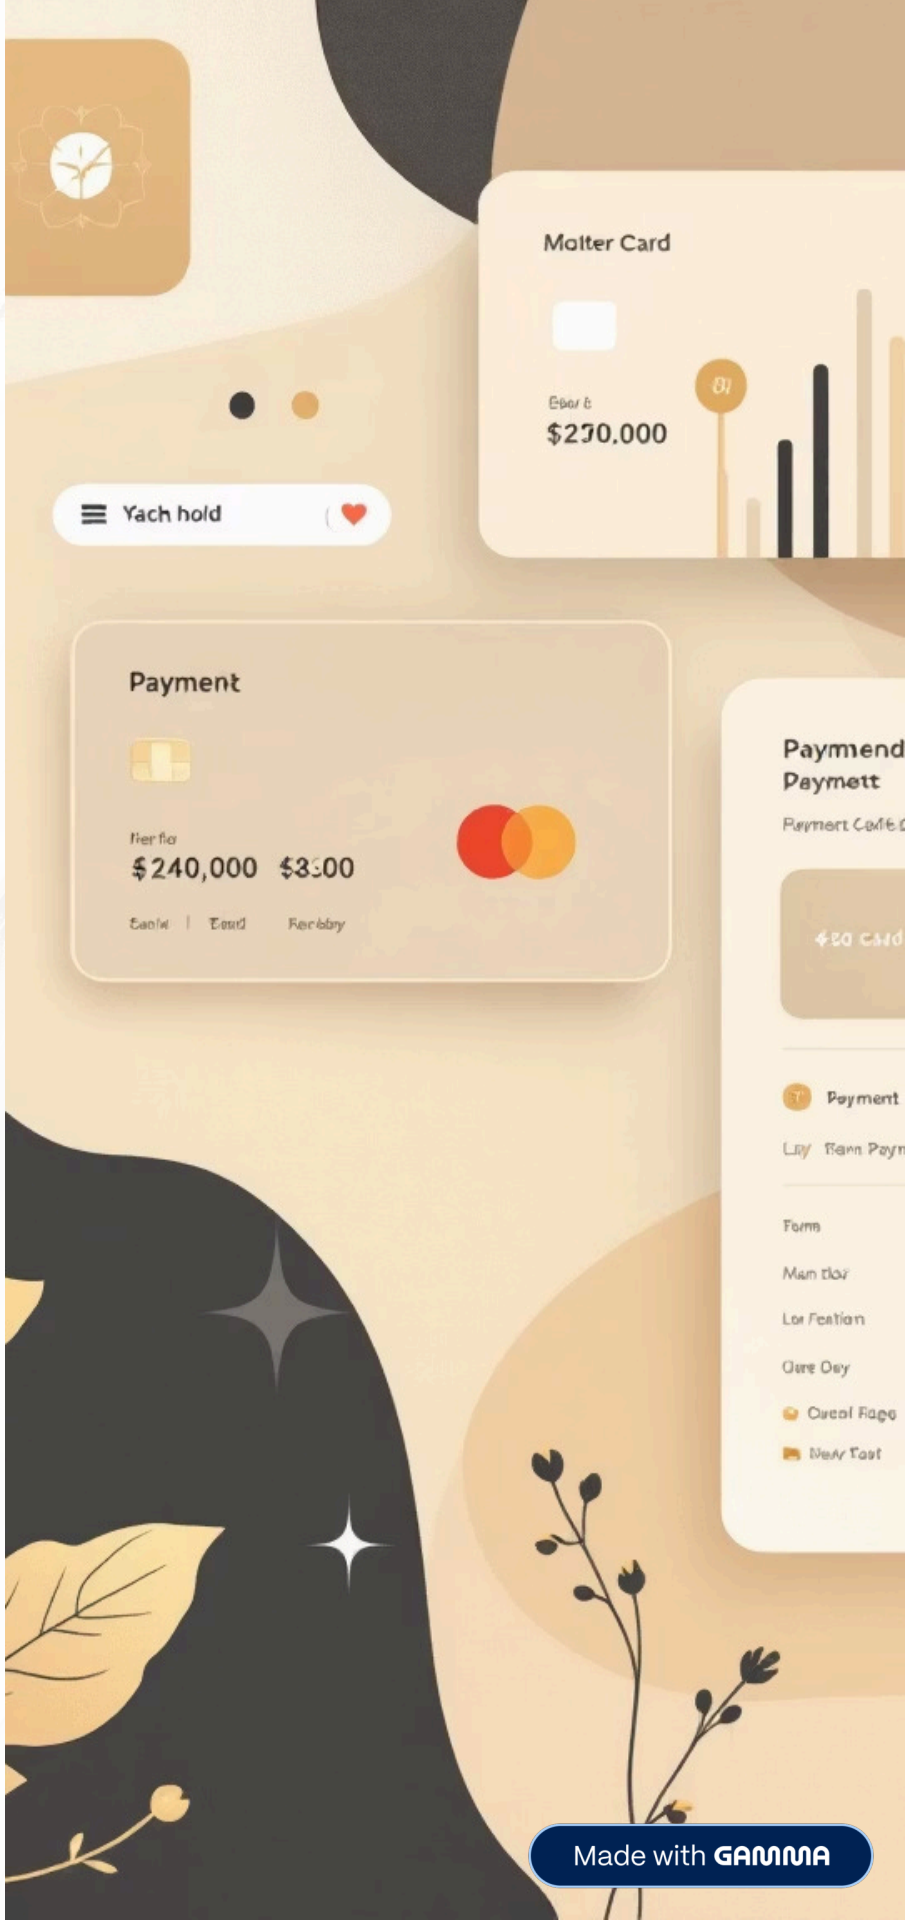

Razorpay, Stripe, PayPal integration for worldwide transactions

Crypto Payments

Cryptomus integration for anonymous cryptocurrency transactions

Telegram Bots

Custom bot development for automation and customer engagement

Digital Marketing Services

500

SMS Marketing

500 SMS/day - ₹500 | 1,000 SMS/day - ₹1,000

50K

Email Marketing

10K-50K emails/day | $50-$100 per campaign

100%

Meta Ads Management

Facebook & Instagram advertising campaigns with optimization

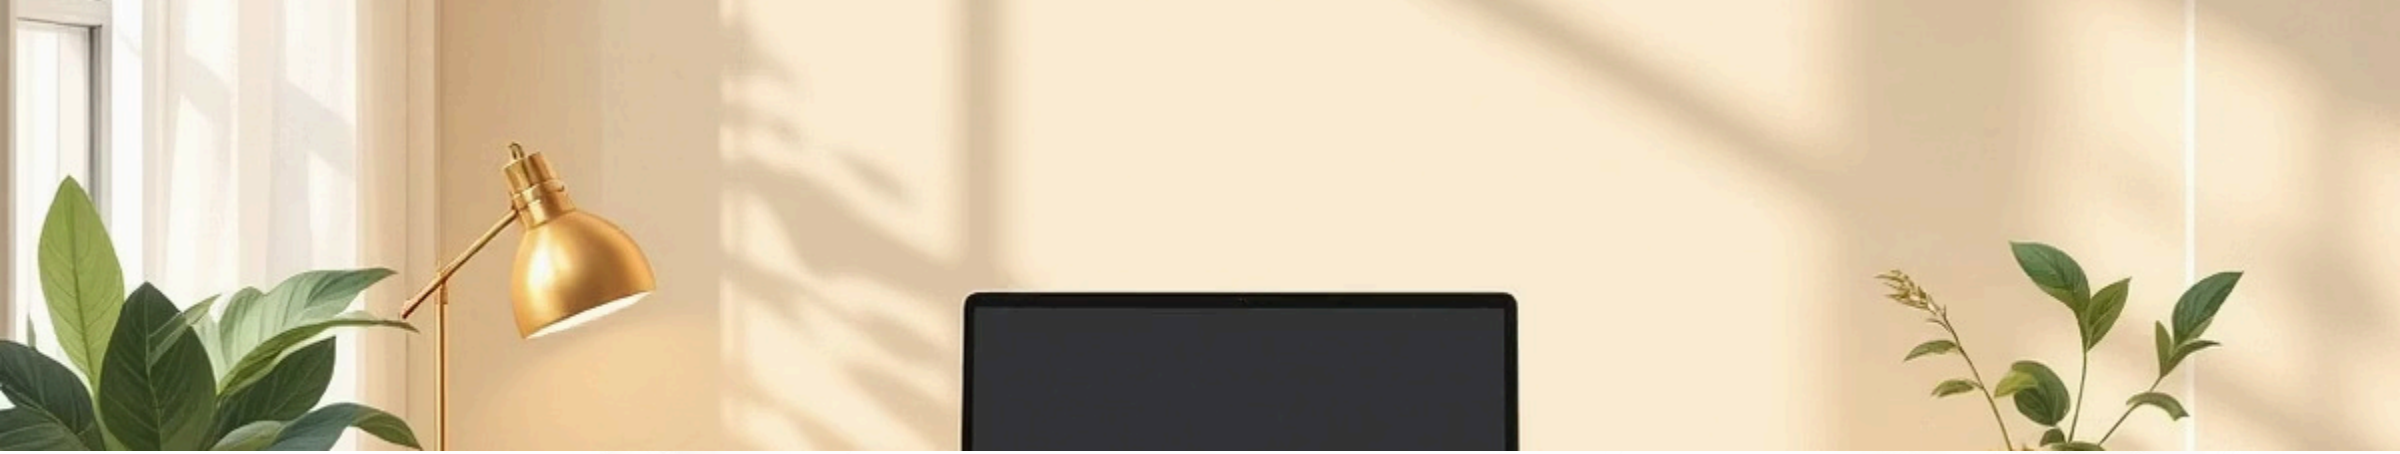

SEO Marketing

Search engine optimization, keyword research, and content strategy for improved rankings

E-commerce Solutions

AI-powered e-commerce with DBMS integration and Google Sheets automation

Made with GAMMA

Content & Business Services

Content Writing

Blog posts, eBooks, MS Excel reports, and Google Sheets documentation

Dropshipping Management

Complete dropshipping business handling from setup to fulfillment

Made with GAMMA

Cybersecurity & Penetration Testing

Vulnerability Testing

XSS, CSRF, SQL injection detection and prevention

Firewall Analytics

Network security monitoring and threat analysis

Bug Bounty Tools

Wireshark, Burp Suite for web security testing

Made with GAMMA

Advanced Infrastructure & IoT

VPS & Supercomputer Hosting

- SSH, root access, hosting setup
- Deployment automation with Git/GitHub
- Supercomputer hosting: 30x-50x normal performance

IoT Projects

- Raspberry Pi 4 & 5 development
- ESP32 microcontroller projects
- Sensor integration & automation
- Arduino IDE programming

Blockchain & Crypto

NFT development, cryptocurrency projects, and blockchain solutions

Made with GAMMA

Coming Soon: Global Expansion

01

Import/Export Business

International trade solutions and logistics management

02

Global Communication

Worldwide connectivity and collaboration platforms

03

World Trade Tourism

Tourism technology and global travel solutions

> **Ready to transform your ideas into reality.** Let's build something extraordinary together.
